PestPac

PestPac Mobile Sketch

Power your technician's ability to easily visualize and service a property's area and devices with a combination of drawing tools, preset icons and advanced grid/satellite image manipulations. Easily create and view sketches of service areas and treatments, including buildings, areas, devices, and objects, right from your mobile device. Save, share and seamlessly sync diagrams to the office and ensure the latest visual no matter where you are.

With Mobile Sketch
YOUR TECHNICIANS CAN:

- Utilize drawing tools to add shapes or create freehand drawings

- Use a grid, satellite map or image as a background

- Drop-and-drag predefined objects and devices

- Add custom labels to increase understanding of sketches or represent other areas

- Assign colors to materials, and use a brush tool to identify material used or suggested in a specific treatment area

- Capture and view the linear and square footage instantly

> "Mobile Sketch with Google Earth and plotting devices is just
> # BRILLIANT!
> With the devices on the map, the technicians are much quicker finding the stations **saving us up to 20% in time per visit.**"
>
> ~ Robert Hicks, CEO, SafeHaven Pest Control
