

THE BETTER WAY TO PAY

With WorkWave Payments

WorkWave Payments, the simplified and streamlined payment processing solution available within your WorkWave ServMan software, has been specifically designed to securely process to the highest payment-industry standard.

Enhance the transaction experience for you and your customers by providing the payment flexibility they want and the tools you need to track and manage your revenue.

One flat rate for all card payment types including American Express and eliminates select fees (Card on File and PCI Compliance).

WorkWave Payments is **included in your existing ServMan software** at no additional cost (your Payments contract is co-terminus).

Secure merchant portal where chargebacks can be disputed and all transactions and processing fees can be reviewed.

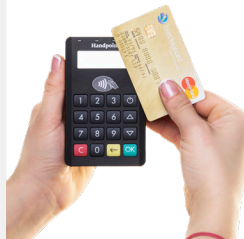

A single number to call where you can speak with **dedicated customer support professionals** regarding all payment and software-related needs.

Ensure recurring revenue as Account Updater monitors your customers' stored cards for upcoming expirations or replacements, preventing missed or delayed payments.

*Our rate quote ALWAYS includes Account Updater

NEW! SERVMAN MOBILE TERMINAL

Increase your cash flow, empower your field techs and drive down costs by collecting payments whenever and wherever there is a physical card present or a mobile wallet.
